-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 16 September 2004.
 2a) This action is **FINAL**. 2b) This action is non-final.
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4) Claim(s) 1-3,6,8 and 34 is/are pending in the application.
 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
 5) Claim(s) _____ is/are allowed.
 6) Claim(s) 1-3,6,8 and 34 is/are rejected.
 7) Claim(s) _____ is/are objected to.
 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9) The specification is objected to by the Examiner.
 10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) Notice of References Cited (PTO-892)
 2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
 3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
 Paper No(s)/Mail Date _____

4) Interview Summary (PTO-413)
 Paper No(s)/Mail Date. _____.
 5) Notice of Informal Patent Application (PTO-152)
 6) Other: _____.

DETAILED ACTION

1. This communication is in response to the Amendment filed September 16, 2004. Claims 1, and 34 have been amended. Claims 4-5, 7, 9-33, and 35-39 have been canceled. Claims 1-3, 6, 8, and 34 are pending in this case.

Response to Arguments

2. Applicant's arguments with respect to claims 1, and 34 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 6, 8, and 34 are rejected under 35 U.S.C. 102(b) as being anticipated by Kujawa et al (US 5,548,633).

4. Regarding claim 1 –

Kujawa discloses a method for providing utility consumption data to a utility consumer over a network, the method comprising the steps of receiving metering data and operational status information from a utility meter located at a remote facility operated by said utility customer, wherein said metering data is electronically and automatically transmitted over the network in substantially real time from said utility meter to a data processing system; calculating billing data using said metering data at said data processing system wherein said calculating step calculates said billing data using generation costs, transmission costs, and distribution costs for said utility; storing said metering data and said billing data electronically at said data processing system; and reporting said metering data and said billing data electronically from said data processing system to said utility customer over the

network, said reporting step, including the steps of providing a website on the network accessible by said utility customer, retrieving said metering data and said billing data from said database, and presenting said metering data and said billing data on said website (e.g. col 1 ln 52-col 2 ln 41).

5. Regarding claim 2 –

Kujawa discloses the method in accordance with claim 1 wherein said receiving step further comprises the step of polling said meter using an electronic communication medium (e.g. col 1 ln 60-65).

6. Regarding claim 3 –

Kujawa discloses the method in accordance with claim 2 wherein said polling step polls said meter using a toll-free telephone line (e.g. col 1 ln 60-65).

7. Regarding claim 6 –

Kujawa discloses the method in accordance with claim 1 wherein said receiving step receives metering data from said meter wherein said meter is suitably configured with a modem for connecting to an electronic data line (e.g. col 2 ln 20-30).

8. Regarding claim 8 –

Kujawa discloses the method in accordance with claim 1 wherein said storing step stores said metering data and said billing data in a computer database (e.g. col 2 ln 22-34).

9. Regarding claim 34 –

Kujawa discloses system for providing energy consumption data over a network for a facility affiliated with as energy consumer, the system. comprising: a receiving means

configured to receive, automatically, metering data in substantially real time, and operational_status information, from a meter located at said facility via a network; a processing means in communication with said receiving means, wherein said processing means is configured to determine pricing options as a function of said metering information and of pricing factors affiliated with an energy source wherein said factors include generation costs, transmission costs, and distribution costs; a transmitting means configured to transmit said pricing options to said energy consumer via the network such that said energy consumer is allowed to evaluate said pricing options to thereby manage energy consumption at said facility, said transmitting means including a website hosted by said utility and accessible to the energy consumer over the network, wherein said website displays metering data and billing data associated with the energy consumer (e.g. col 1 ln 52-col 2 ln 41).

10. Examiner's note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may be applied as well. It is respectfully requested from the applicant, in preparing the responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

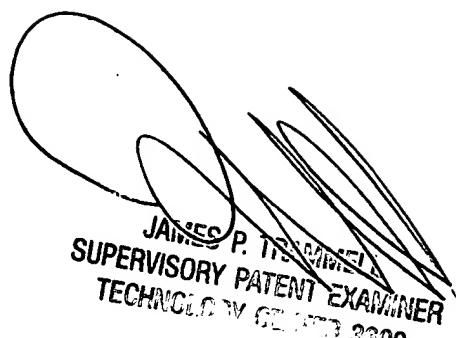

12. James (US 4,700,188) discloses an electric power measurement and hall effect based electric power meter for use therein.

13. Merriam et al (US 5,311,581 A) discloses a remote meter reading method and apparatus.

14. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cristina Owen Sherr whose telephone number is 703-305-0625. The examiner can normally be reached on 8:30-5:00 Monday through Friday.

15. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Trammell can be reached on 703-305-9768. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

16. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
